ABHILASH EMMANUEL PMP®

Software Engineer & Technical Delivery Lead | PMP®
bewithaby@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Technology professional with a career spanning enterprise application support, technical delivery for global media platforms and, since 2023, the design and build of AI systems and native mobile apps. At Infosys, led L2/L3 support and data integration for US enterprise clients, cutting ticket volume by 50%; at Akamai, managed technical delivery for broadcasters including Disney and Foxtel, with zero downtime for 30M+ concurrent viewers. Current work covers AI workflow automation for clients, a multi-agent video platform, and a world clock app published on Google Play and the App Store. PMP® certified, with an MSc in Cyber Forensics and Information Security.

CORE SKILLS

AI & Automation	Generative AI, agentic AI, multi-agent orchestration, RAG, MCP, prompt engineering, Claude API, OpenAI, OpenRouter, n8n, Make
Development	Python, TypeScript, JavaScript, C#.NET, React, Node.js, REST APIs, Supabase, Kotlin, Swift
Mobile	Native Android (Jetpack Compose, Room), native iOS (SwiftUI, WidgetKit, StoreKit 2), Google Play Console, App Store Connect
Data	SQL Server, PostgreSQL, Oracle, DB2, ETL (SSIS, Informatica), SSRS reporting, data quality
Cloud & Infrastructure	AWS, Azure, Akamai CDN, DNS, TCP/IP, CI/CD, GitHub, Docker
Service Management	ITIL incident, problem and change management, SLA / SLO, PagerDuty, ServiceNow, runbooks, post-incident reviews
Delivery	PMP®, Agile / Scrum, stakeholder management, executive reporting, Jira, Confluence
Security	OWASP Top 10, role-based access control (RBAC), row-level security, OAuth, API security

WORK EXPERIENCE

AI Solutions Architect & Technical Consultant, *Freelance* — **Aug 2023 - Present**

- Design and deliver AI and automation solutions for client platforms, from requirements and architecture through go-live and handover.
- Support resolution times fell 30-40% after AI-assisted triage workflows were built in n8n and Make and connected to client systems over REST APIs.
- Integrated OpenAI and Claude models into client products, with OpenRouter routing each task by cost and capability; end-user engagement rose 25%.
- Train non-technical teams to run and extend the workflows after handover.

Technical Project Manager, *Akamai* — **Jul 2020 - Jul 2023**

- Primary technical contact for enterprise media and streaming customers including Disney, Foxtel, Seven Network, ESPN and Jio Hotstar.
- Delivered IPL and FIFA World Cup live streaming with zero downtime for 30M+ concurrent viewers.

- Led incident triage, severity assessment and escalation across follow-the-sun teams, and wrote the runbooks and post-incident reviews that followed.
- Cut uncoordinated work by 60% through daily traffic monitoring and anomaly detection.
- Ran executive briefings and governance sessions, keeping 800+ staff aligned around major events.

Technology Lead, *Infosys Ltd.* **Oct 2009 - Jun 2020**

- Owned L2/L3 incident and problem management for mission-critical SaaS applications at US enterprise clients, including Northwestern Mutual and, earlier, Kraft Foods, Mondelez International and Kellogg's.
- Ticket volume down 50% and CSAT up 30% after recurring incidents were traced to root cause and fixed.
- Built ETL pipelines in SSIS and Informatica across SQL Server, Oracle and DB2, with SSRS reporting and data quality checks.
- Developed full-stack applications in C#.NET, ASP.NET MVC and Azure, and integrated systems through APIs and identity management.
- Founded an Innovation Lab that delivered 10+ strategic solutions; three years on-site in Chicago as the client's technical lead.

PROJECTS

Lead Product Engineer, *Sequency (AI Video Platform)* **Jan 2026 - Jun 2026**

- Built a multi-agent platform that turns a script into a finished short film, coordinating video, voice and music generation; production time dropped by more than 60%.
- Stack: React, TypeScript, Supabase (Postgres, Edge Functions, Auth) and fal.ai, with a model registry routing generation across Kling, Seedance, Veo and Grok.
- Designed the credit and subscription system with an escrow-based transaction ledger and Razorpay payments.

Mobile Developer, *Spiny Valley - Unichrono* **Jul 2026 - Sep 2026**

- Designed, built and published a world clock app solo, natively on Android (Kotlin, Jetpack Compose) and Apple platforms (Swift 6, SwiftUI), live on Google Play and the App Store since Sep 2026.
- Home and Lock Screen widgets keep correct time with no background jobs, verified by overnight drift tests on real devices.
- Backed by 600+ automated tests; no backend, no accounts and no analytics, with a StoreKit 2 one-off Pro purchase.

EDUCATION

AI Generalist Fellowship 2025 - 2026

Outskill

Master of Science in Cyber Forensics and Information Security 2020 - 2022

University of Madras, Chennai

Bachelor of Technology in Applied Electronics & Instrumentation 2005 - 2009

Mahatma Gandhi University, Kottayam

CERTIFICATIONS

- PMI - Project Management Professional (PMP®)
- Microsoft MCSA: Web Applications | MCSD: App Builder
- Microsoft MS 461: Querying SQL Server | MS 483: Programming in C#
- Infosys Certified Cloud Computing Professional (Windows Azure)
- Harvard ManageMentor - Presentation Skills
